

Project Status Report: CEE-2019CPST-009

Report Date: 10/2/2021

Team Members: Christian Baez, Anna Gillespie, Brendon Allred, Sheridan Hancock

Project Title: Reinforced Concrete

1) Summary of technical/non-technical challenges encountered

- Not knowing many details about our project led to challenges in identifying a WIG and specific lead measures.

2) Team approaches & resolutions to overcome challenges

- We proposed WIGs that focused more on our team dynamic and high quality of work rather than the project itself
- We reached out to Dr. Mitchell through email for more information regarding the project

3) Status of challenge resolutions & potential project impact

- We have not yet heard back from Dr. Mitchell regarding our project details. We feel unable to start planning and making decisions when the nature of the project is still unclear
- We have decided on a WIG focused on quality of work. This will allow us to work hard and be set up for success when we do begin working on our capstone project

4) Project status & summary

- We have not begun the project yet, but we have met as a team and feel well prepared to begin. We are excited about our WIG and want to do our best this semester.

Please enter # of hours spent on project this last week for each team member in the order listed above
