

Project Status Report: CPST-0 03

Report Date: 11/22/2021

Team Members: Sarah McClellan, Braden Vance, Derek Warren, Cat Calancea

Project Title: Timpanogos Special Service District

1) Summary of technical/non-technical challenges encountered

This week we have been working on our statement of work. It was somewhat difficult to coordinate the completion after we worked on it last monday due to differences in schedule as well as the impending thanksgiving break.

2) Team approaches & resolutions to overcome challenges

The main solution to this issue we solved by doing the grand majority of work on the statement of work on Monday. Throughout the week all that remained was a bit of polishing and our resumes. Our resumes were put on at our own discretion, and the polishing was done as needed by our team lead Sarah.

3) Status of challenge resolutions & potential project impact

We now find ourselves with our statement of work submitted to learning suite and a basic plan of how to proceed with our project. Our statement of work is our scope for this project and contains everything that we have committed to do. This will create the boundaries of our project and now that it is defined we can proceed with the actual work.

4) Project status & summary

The project is prepared to begin following Thanksgiving break. As the statement of work outlines, the rest of the semester will be spend collecting the necessary resources to begin design production in Winter 2022.

Please enter # of hours spent on project this last week for each team member in the order listed above
