

**Project Status Report: CPST-0 15**

**Weekly Mtg: 2/25/24 EB**

**Team Members: Dennisse Alejo Juarez, Lucky Bahati, Lexie Isbell, Tyler Peterson**

**Project Title: Timber Strong Competition**

**1) Summary of technical/non-technical challenges encountered**

- No real challenges at this time. Working on phase II of the project, which includes making a BMI model of our structure on revit and designing the framing.

**2) Team approaches & resolutions to overcome challenges**

- We are finding time to work on the project in the cadem lab and are communicating with each other on how to get the work done.

**3) Status of challenge resolutions & potential project impact**

- We are not competing in the Timber Strong Competition but will be performing all of the same work. We are doing everything except the building portion of the project.
- We are planning on taking extra care to make the Revit design look realistic to replace the physical building of the project.

**4) Project status & summary**

- Met with Dr. Mitchell to discuss options moving forward with our project since we are not competing.
- Project is moving forward and projected to be completed well before the end of the semester.

Please enter # of hours spent on project this last week for each team member in the order listed above
