

Project Status Report: CPST-0 11

Report Date: 3/18/2024

Team Members: Samuel Cuessy, Spencer Moon, Blake Hull, Beau Switzer

Project Title: Precision Thermal Drones

1) Summary of technical/non-technical challenges encountered

- We are finalizing where we think the delamination spots are.
- We are using autocad to make a presentable sheet that shows where the warm spots on the bridge are
- We are currently doing the write up

2) Team approaches & resolutions to overcome challenges

- We agreed on which spots on the bridge should be considered delaminations now we just need Dr Guthrie's approval

3) Status of challenge resolutions & potential project impact

- We are all doing our portion of the write up

4) Project status & summary

- We are coming close to the deadline of our project and need to finish soon.

Please enter # of hours spent on project this last week for each team member in the order listed above
